

YOU WANT TO USE DIGITIZATION TO DRIVE PROCESS EXCELLENCE?

Join our team.

Senior Consultant/ Project Manager (f/m/d)

Digital Transformation with Supply Chain Management, operations & ERP focus

With more than 3,000 successful projects to our credit, we are the leading experts for operational excellence & industry 4.0. As part of the EFESO Group with around 500 employees, we are one of the leading consulting firms in Europe. For us, being an excellent employer means more than performance-based compensation and comprehensive benefits. We support our employees at all stages, both in their day-to-day work and in their long-term career planning.

We offer

- Flexible career options across departments and countries in a dynamic, global consulting environment with more than 30 locations
- Practice-oriented onboarding, regular training and development measures tailored to your needs
- A steep learning curve through varied tasks and projects with a high level of personal responsibility
- A distinctive team culture with numerous employee offerings

Your profile

- Fluent in German is mandatory
- Successfully completed studies as an engineer / industrial engineer
- Several years of professional experience in supply chain management, production, S&OP or logistics
- Profound knowledge in re-design, optimization or automation of business processes
- Project experience from ERP or MES/APS implementation projects, preferably in the SAP ERP, S4/HANA or APO/IBP environment
- Strong IT affinity and passion for new technologies and trends as well as their meaningful use in companies
- Strong process orientation, high analytical, methodical and conceptual skills as well as proven implementation competence
- Strong analytical, methodological and conceptual skills as well as proven implementation expertise
- Convincing and professional appearance as well as distinctive ability to work in a team

Your tasks

- Interdisciplinary project work with well-known medium-sized and corporate customers
- Independent project management for the implementation of Industry 4.0, IoT and Smart Factory strategies
- Teamwork oriented towards competence, experience and humanity
- Active participation in internal knowledge management
- Development of digitization strategies and support in the selection and implementation of new technologies
- Management and orchestration of system providers and software service providers in the context of IT transformations in an international environment
- Independent project management for the optimization of business processes along the value chain
- Creation of business case analyses and IT concepts as well as the presentation of these to C-level management
