Your tasks & responsibilities:
• Maintain day to day operations of websites as well as additional custom applications such as those developed for Sales and Marketing support
• Support on premise and Cloud infrastructure
• Enhance CSS and code architecture to support mobile browsers with content in multiple languages using bootstrap responsive CSS technology that integrates with Episerver methodology
• Develop/deploy templates/pages to support product launches along with any new features/data points that adhere to established Design Guides
• Configure, track, analyze and interpret website analytics reporting using Google Analytics, SEOmoz, Marketo and other tools to measure KPIs and eMarketing's activities effectiveness
• Integrate website with in-house systems responsible for User Registration, Financial/Pricing data, etc.
• Integrate Web content and reporting with CRM platform using Episerver, Salesforce and Marketo
• Develop new features (end user tools, expand data points, charting, etc.) as determined by Marketing on IIS 10, .NET and C#
• Evaluate, compare and recommend appropriate third-party tools, cloud solution, etc. depending on

requirements

• Collaborate with Project Management to gather requirements from business unit heads - provide technical analysis for scoping requested features and help manage implementation schedules using Jira and alternative project management tools

• Develop/Maintain Development/QA/UAT/Production/DR workflow for code, data and content

• Work with IT Infrastructure to maintain and document hardware architecture (including Disaster Recovery, Failovers, etc.) using Visio and UML diagrams

• Knowledge of Microsoft SQL Server Tables, Views and Stored procedures

• Work with external vendors in developing and maintaining internationalization of sites

Your qualifications:

• Computer Science or Information Systems (Preferably with Master's degree)

• Minimum 7 years of experience in C# web development in an IIS environment

• Minimum 3 years of experience in SQL Server development

• Minimum 2-3 years of CMS Experience (Preferably in EPiServer)

• Minimum 1 year of UI Experience (SASS or Less)

• Experience with headless architecture a plus

• Experience in designing and building web environments in Cloud (Preferably AWS) a plus

• Strong technical lead experience and qualification

• Experience with AJAX, XML, JSON, REST and Soap Services

• Experience managing on premise and cloud infrastructure for websites

• Experience in using Performance and Debugging tools

• Excellent communication skills both verbal and written

Your professional future:

- Work for an internationally-oriented company, where all the staff are qualified, talented, and diverse people
- Receive a fair compensation in a stable position
- You will have the opportunity to put your skills in practice, and expand your work experience into a valuable career

We look forward to your application!
